Product Overview

AI Agent

Deploy intelligent AI to handle customer queries, streamlining communication and improving overall customer satisfaction by ensuring swift and accurate responses.

AI Guru

Empower your teams with AI Guru, the intelligent in-house LLM (Large Language Model) designed to streamline user processes and boost productivity with instant query resolution.

AI Analytics

Equip agents with real-time insights and suggestions, optimising performance by enabling them to provide informed and efficient support, elevating the quality of customer interactions.

AI Voice

Transform written content into lifelike spoken words, enhancing accessibility and engagement, resulting in a more inclusive and satisfying customer experience.

Automatic Speech Recognition

Automate call interactions seamlessly, providing efficient and convenient voice-based services that not only reduce response times but also enhance overall customer engagement.

Athena

Revolutionise Your Business

"Having Athena as a concierge to be able to gather information is going to be huge in minimizing our wait time and improving the customer experience."

Ezequiel Negrón, **Director of IT | Exact Medicare**

Advantages of AI Agent

- ✔ **24/7 Availability**
AI Agent operates 24/7, boosting satisfaction by providing timely assistance and information.
- ✔ **Scalability**
As your business grows, AI Agent seamlessly scales to handle increasing volumes of conversations and enquiries without compromising on quality or response times.
- ✔ **Cost Efficiency**
Automate repetitive tasks and provide 24/7 support, freeing financial resources for better allocation.
- ✔ **Improved Customer Satisfaction**
With faster response times and personalised interactions, AI Agent enhances overall customer satisfaction.
- ✔ **Enhanced Compliance**
AI Agent minimises human error by ensuring regulatory disclosures and compliance requirements are always met, reducing the risk of omissions and mistakes.
- ✔ **Consistent Experiences**
AI Agent delivers a consistent and standardised experience to every customer, ensuring that all enquiries are handled with the same level of accuracy and professionalism.

Athena | AI Agent

Empowering your business with AI Agents

Athena Agent is the hero your business needs. By seamlessly managing routine tasks like authentication, appointment booking, payment processing, FAQ responses, and more, Athena frees up your human agents to tackle more intricate challenges. This not only minimizes burnout and agent turnover but also boosts job satisfaction.

With Athena, you can ensure consistent adherence to Service Level Agreements (SLAs), exceed customer expectations with quicker response times, and effortlessly scale as your business expands.

The screenshot displays the ConnexAI Athena AI Agent interface. The top section shows a workflow for 'Pizza Ordering' with nodes like 'Start', 'Utterance', 'Slot: Flavour', and 'Confirmation'. The bottom section is a dashboard with various metrics and a table of AI Agents.

Dashboard Metrics:

- 23 Average Wait
- 120 Total Interactions
- 92% Connect Rate
- 23m Average Duration
- 27 Solved Interactions
- 4 Transferred Interactions
- 67 Fulfillments
- 23 Active AI Agents

Athena | AI Agent

Keep the personal touch, whilst reducing workforce costs

Businesses can leverage AI Agent to automate repetitive tasks, handle both complex inbound and outbound enquiries, and provide instant, round-the-clock support across voice and digital channels. This not only frees up critical financial resources but also ensures a more efficient allocation of human agents. With advanced AI capabilities, the AI Agent fosters personalised interactions, reduces response times, and enhances overall customer satisfaction, enabling companies to maintain a personal touch without increasing workforce costs.

Athena | AI Agent

Handle 50x more interactions using your trained model

AI Agent optimises interaction management, enquiry servicing, and allows your users to devote their attention to the most time-sensitive interactions.

Athena | AI Agent

Embrace the power of voice

AI Agent revolutionises customer interactions with refined, human-like voice and text-based communication, setting a new standard beyond traditional chatbots and driving unparalleled business success.

Drawing on the powerful and extensive Athena LLM, AI Agent is able to hold articulate conversations that will steer interactions efficiently towards sufficient customer outcomes.

Combat agent fatigue whilst offering insightful responses, maintaining professionalism, and promoting customer satisfaction.

Athena | AI Agent

Save time and money by reallocating human resource thanks to AI Agent

AI Agent dramatically reduces time and admin costs by ensuring that each interaction is handled promptly and effectively.

Athena | AI Agent

Coherent AI-driven conversations

Elevate your business with effortless AI-driven conversations across all channels. Our AI Agent ensures responses that reflect your company's values, offering complete control over language and tone.

With consistent, high-quality interactions in both voice and text, experience the transformative impact of generative AI, enhancing customer engagement and satisfaction at every turn.

Athena | AI Agent

Continuously improve your AI agent's performance

Athena's training feature helps your AI Agent to learn and grow over time, allowing it to train for accuracy by matching specific customer phrases and intents to predefined user journeys.

When the AI agent comes across phrases it has a low confidence of understanding, you can boost confidence by confirming the intent and training it to recognise and respond to these phrases more accurately in future interactions.

Furthermore, our AI training module includes a summary page with "Knowledge Recommendations" and "Confidence Levels," which can help you identify knowledge gaps where Athena may require additional information from more detailed knowledge articles or additional training.

The screenshot displays the ConnexAI interface, divided into two main sections: Training and Knowledge Recommendation.

Training Section:

- Utterances:** A list of customer phrases with their frequency counts. Examples include "Hello" (234), "I want fries" (45), "Dollar" (56), "Chicken" (34), "Installation" (192), and "Help me" (44).
- Best Match:** The system's current classification for each utterance. Examples include "Greeting", "Fries Ordering", "Money", "Pizza Toppings", "Help & Support", and "Customer Support".
- Average Confidence:** A progress bar indicating the system's confidence level. For "Money", the confidence is 25% (highlighted with a red bar), while others are at 75% or 100%.

Improved Average Confidence Section:

- Shows a specific example for the "Money" intent, with a confidence level of 100%.

Knowledge Recommendation Section:

- “Currency Options”:** The specific knowledge gap identified.
- Upload Options:** Buttons for "Text", "Hyperlink", and "File Upload".
- Upload Area:** A dashed box with the instruction "Click to upload or drag and drop" and supported file types: "SVG, PNG, JPG or GIF (max. 3MB)".
- Uploaded File:** A file named "Currency Options.pdf" (100KB) is shown as "Complete" with a progress bar.

Athena | AI Agent

Empower your in-house LLM with customisable information

Effortlessly train your AI Agent by providing them with contextual information sources and documentation, transforming them into knowledgeable and contextually aware team members.

Athena

Your Intelligent Co-pilot

"The fact that we can train our own large language model to match our brand voice is pretty substantial."

Harvey Allaby, **Director of Operations** | Exact Medicare

Advantages of AI Guru

✓ Cost-Effective

AI Guru reduces agent training time and costs, provides instant access to company knowledge, ensures immediate productivity, and leads to faster ROI.

✓ Live Support

Provide fast, comprehensive user support without heavy reliance on extensive training and managerial oversight, allowing experienced staff to focus on complex tasks and strategic initiatives.

✓ Boost Satisfaction

Decrease response times, ensure accurate and immediate answers, and achieve more satisfying customer interactions.

✓ Advanced AI algorithms

Seamlessly integrate with your knowledge base, providing precise answers within seconds, reducing distractions and administrative time, and enhancing overall efficiency and productivity for agents handling a wide range of queries.

✓ Dynamic Guidance in Real-Time

Real-time call transcripts offer immediate written records of customer interactions, facilitating swift analysis and issue resolution, while real-time coaching amplifies responsiveness and customer satisfaction with quick referencing and accurate responses.

Athena | AI Guru

Real-time, intelligent support for users

AI Guru is your revolutionary internal assistant, designed to streamline user communications and boost productivity. AI Guru transforms how teams operate when interacting with customers, offering instant access to practical knowledge, advanced conversational capabilities, and unparalleled support.

Athena | AI Guru

Knowledge base recommendations

AI Guru quickly accesses your knowledge base to provide agents with precise answers and contextually relevant article suggestions, ensuring smooth interactions and faster completion times.

Athena | AI Guru

Learn and adapt through your personalised model

By learning and adapting through your personalised model, AI Guru evolves with your business needs and customer expectations, providing personalised and efficient support.

Athena | AI Guru

Dynamic guidance in real-time

Power up your Guru with Athena, providing dynamic, real-time guidance during customer interactions. This feature enhances agent performance by offering instant access to accurate answers and contextually relevant information. AI Guru analyses complex queries and delivers precise answers quickly and efficiently, reducing the time agents spend searching for information.

Athena

Supporting Data-Driven Decision Making with AI

"Sentiment analysis and Quality Management derive deep levels of insight from our customers and add real value. The core element our clients ask for is insight - and we have that in spades."

Craig Winnard, Group Commercial Director | Intelling

Athena | AI Analytics

Advantages of AI Analytics

✓ Deeper understanding

Better understand and predict customer sentiment, wants and needs

✓ Instant insights

Integration with AI Analytics provides effortless and rapid access to insights and reports, facilitating swift decision-making

✓ Topical data packaging

Data insights built with your business in mind, linking and presenting information that's relevant for you

Athena | AI Analytics

Intelligent insights to power your business

Forecast customer support needs and streamline your operations with the power of AI-transcribed and packaged analytics that fit your business needs. Leverage AI-transcribed analytics from both voice and digital interactions to gain a comprehensive view of customer support across all channels.

AI Analytics summarises interactions conveniently and optimally, offering insights on sentiment, key phrases, data capture, and more. This allows you to review meaningful insights and make informed predictions and decisions. By digging deeper into customer interactions, you can understand and address underlying issues more effectively.

With these powerful AI Analytics, you can forecast customer support needs more accurately and use these insights to optimise resource allocation and improve operational efficiency. AI Analytics also integrates seamlessly with other ConnexAI modules, empowering leaders with data-driven insights to refine strategies and operations, ultimately enhancing decision-making and streamlining business processes.

Athena | AI Analytics

Automated interaction summarisation

AI Analytics conveniently connects with your existing ConnexAI modules, allowing you to extract useful insights from interaction summaries without having to perform the analytical chore of interpreting meaning across multiple conversations.

Review the most popular keywords and phrases in your interactions to spot industry trends and understand the meaning of your conversations.

Keyphrase Analysis

Wordcloud

Athena | AI Analytics

Entity recognition

Allow AI Analytics to identify and classify the most important elements within conversations to transform unstructured data into actionable information. Utilise entity recognition insights to improve data analysis, automate your processes, and provide better customer experiences.

By enabling businesses to act proactively, Athena can help prevent issues before they escalate. For example, if a manufacturer begins shipping out defective products and starts receiving calls regarding these defects, leaders can spot this trend early and take immediate action to prevent further defective units from being shipped. This proactive approach is vital across various industries, as it allows businesses to address potential problems swiftly, minimising negative impacts and enhancing customer satisfaction.

The ability to be proactive is crucial, and Athena Analytics provides the tools necessary to train your team on its importance, ensuring that your business remains agile and responsive in an ever-changing market.

Athena | AI Analytics

PII identification and redaction

Never worry about security and compliance, with astute identification and redaction of PII from Athena Analytics, allowing you to collate and interpret reporting without the risk of critical customer data being compromised.

Athena

Empower Your Brand with
Customisable Voice Solutions

"The ConnexAI platform will take us even farther in the future."

Tika Solis, [Call Centre Manager](#) | [RiseTek Global](#)

Athena | AI Voice

Advantages of AI Voice

Simplicity

- ✓ Easily scale AI Agents to handle varying call volumes without the need for additional staff, especially during peak times

Personal

- ✓ Select from both digital and voice-based input to maintain security and personalise interactions for customers

Consistency

- ✓ Manage voice communication between AI agents and customers to ensure consistency in brand identity and levels of support

Athena | AI Voice

Tailored communication that represents your brand

With sophisticated linguistic programming tailored to your brand's tone of voice, formality, and language requirements, Athena's Text-to-Speech (TTS) and Speech-to-Text (STT) solutions seamlessly integrate with your business. By creating authentic AI voices that match or enhance your brand identity, Athena ensures consistent and engaging customer interactions.

Athena Voice offers a range of configurations, enabling you to build a voice that represents your brand's unique characteristics, helping to strengthen brand recognition and customer satisfaction.

Athena | AI Voice

Automate your customer service needs

Combine historic insights with carefully crafted speech patterns and sensibilities to represent your company with AI Voice interactions based on expected enquiries, freeing up vital human resources.

Athena | AI Voice

Instant brand recognition across digital channels

Effortlessly converse through TTS functionality with impressive precision options, to craft a customer-facing tool that will represent your company with conversational traits synonymous with your brand. Configure tone of voice, formality, and even language complexity, to engage customers in a manner appropriate to them and to your business.
